Market Linkages

A woman wearing an orange headscarf and a blue patterned shirt is pouring a large amount of grain from a metal bowl. The grain is falling in a thick stream, creating a cloud of dust or chaff around it. The background is a blurred field of dry grass and trees.

“ICRISAT, Golden Flour Mills, Honeywell Flour Mill, Flour Mills of Nigeria, and Northern Flour Mills have worked with us since the end of MARKETS II.”

— Sorghum farmer, Kiru

“We have actually become competitors with Labana.”

— Female rice farmer, Kebbi

Increased Access to and Use of Technology

"Farmers continue to adopt MARKETS II technologies because production has expanded, income has increased, and livelihoods have improved. They can only continue to do better."

— Extension agent & service provider, Kebbi & Kaduna

"Farmers continue to adopt MARKETS II technologies because production has expanded, income has increased, and livelihoods have improved. They can only continue to do better."

— Extension agent & service provider, Kebbi & Kaduna

“I transplant for other farmers at 200 NGN per 20 square meter basin. I earn as much as 1,000 NGN a day in transplanting for people.”

— Male youth, Kebbi

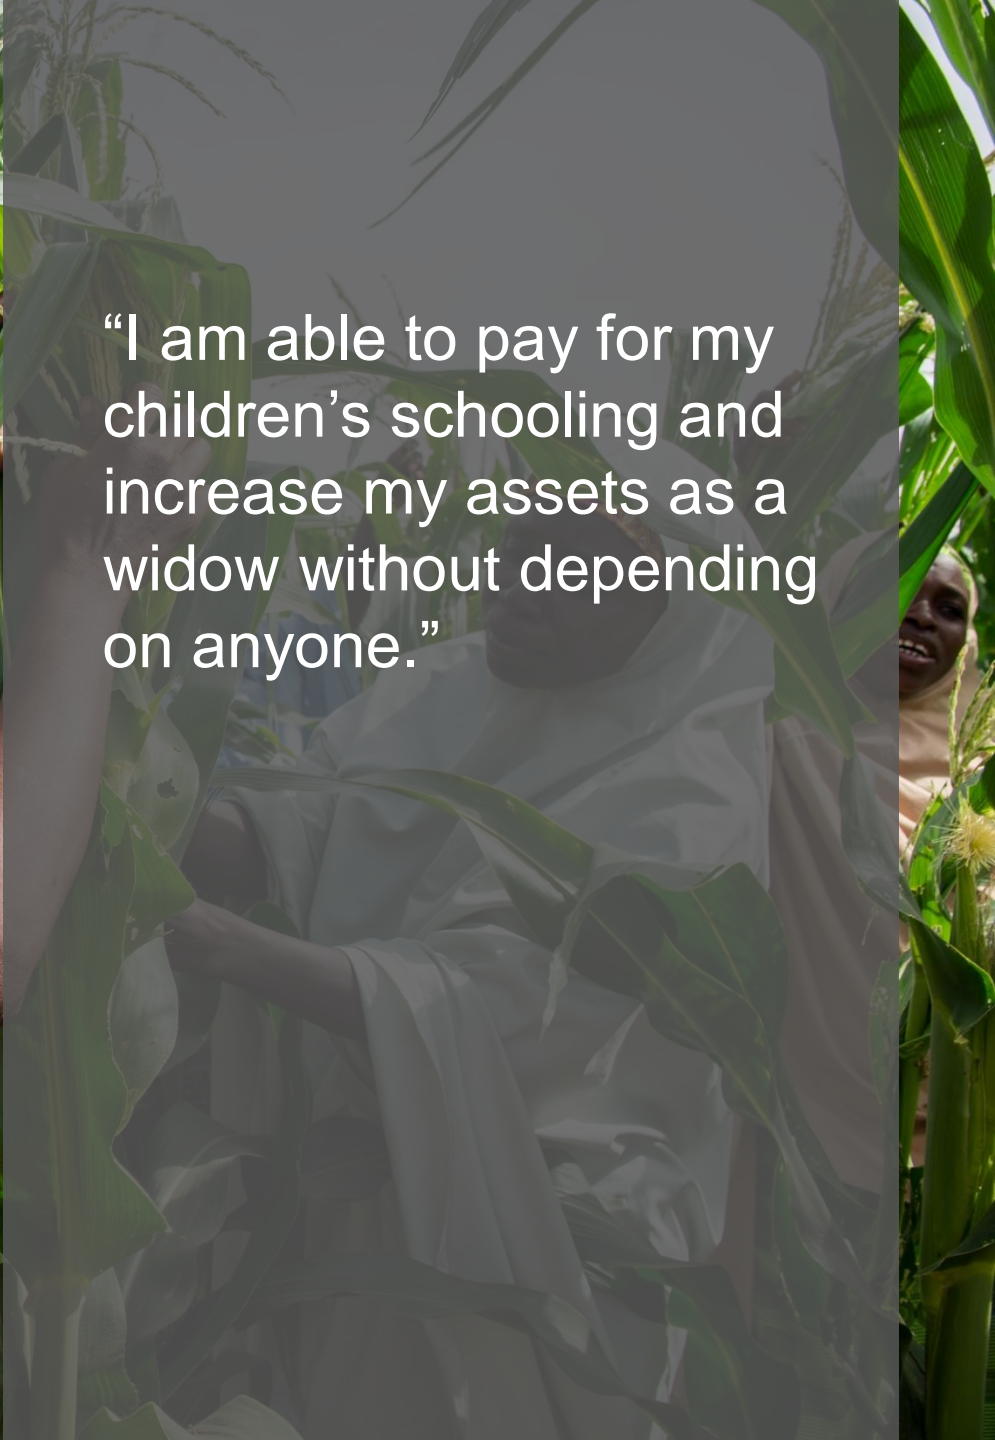

“We were asked by our state government to provide technical training for the farmers in Imo and Niger states. I trained 150 extension agents and 500 farmers in Imo.”

— ADP extension agent, Kebbi

Lessons Learned

“I am able to pay for my children’s schooling and increase my assets as a widow without depending on anyone.”
